Fourth-Quarter Business Commentary:

- Fourth-quarter revenue results improved on a sequential quarter basis for all major segments, due primarily to improved capital markets.
- The fourth-quarter 2009 results include \$7.7 million of amortization expense associated with a change in the useful life of previously capitalized software development costs for some components related to GWP. This charge was due to the replacement of these components with components contained in the most recent release of GWP that occurred in Q4 2009. The bulk of this expense is contained in the Private Banks segment (\$5 million) and the Investment Advisors segment (\$1.9 million), depressing fourth-quarter 2009 margins. This is the second half of charges first reported in third-quarter, 2009.
- The fourth-quarter 2009 results include losses of \$4.0 million associated with SIV-related issues, whereas results in fourth-quarter 2008 included losses of \$64.3 million. SEI has recognized cumulative losses of \$189.1 million associated with these SIV-related issues through December 31, 2009. As previously reported, SEI has now purchased all SIVs owned by its money market funds and has no capital support agreements left in place. Additional information pertaining to SIV-related issues involving SEI-sponsored money market funds is contained in SEI's 2008 Form 10-K filed February 25, 2009 and SEI's 2009 third-quarter Form 10-Q filed November 3, 2009.
- Assets under management increased by \$2.7 billion during the fourth-quarter 2009 to \$158.8 billion, primarily due to market appreciation.
- In the fourth-quarter, SEI purchased 1,243,000 shares of its common stock for \$22.1 million.
