## First-Quarter Business Highlights:

- Revenues from Asset management, administration, and distribution fees increased primarily from higher assets under administration in our Investment Managers segment due to market appreciation and positive cash flows from new and existing clients.
- Average assets under administration increased \$142.4 billion, or 21%, to \$821.6 billion in the first-quarter 2021, as compared to \$679.2 billion during the first-quarter 2020 (see attached Average Asset Balances schedules for further details).
- Average assets under management, excluding LSV, increased \$43.2 billion, or 18%, to \$280.4 billion in the first-quarter 2021, as compared to \$237.2 billion during the first-quarter 2020 (see attached Average Asset Balances schedules for further details).
- Net sales events in the Private Banks and Investment Managers segments during first-quarter 2021 were \$17.5 million, and are expected to generate net annualized recurring revenues of approximately \$13.0 million when contract values are completely realized.
- Net sales events in asset management related businesses of the Investment Advisors and Institutional Investors segments and the Asset Management Distribution (AMD) business in the Private Banks segment during first-quarter 2021 were negative \$12.7 million, mainly related to net losses in our legacy Institutional client base of \$9.9 million and a single product use client in the AMD business line of the Private Banks segment.
- The increase in operational expenses was primarily due to increased consulting costs related to our continued investments in new business opportunities, such as our One SEI<sup>SM</sup> strategy and IT Services offering, as well as increased personnel costs to service new clients in our Investment Managers segment. This increase was partially offset by a decline in travel and promotional-related expenses.
- Earnings from LSV increased by \$3.5 million, or 12%, to \$33.4 million in first-quarter 2021, as compared to \$29.9 million in first-quarter 2020. The increase in earnings was due to higher assets under management from market appreciation. Negative cash flows from existing clients and client losses partially offset the increase in earnings from LSV.
- Stock-based compensation expense in first-quarter 2021 increased \$2.8 million as compared to first-quarter 2020 due to equity awards in late 2020.
- We recorded a net gain from investments of approximately \$332 thousand during the first-quarter 2021 as compared to a net loss of approximately \$4.0 million during the first-quarter 2020.
- We capitalized \$6.3 million of software development costs in first-quarter 2021 for continued enhancements to the SEI Wealth Platform<sup>SM</sup> (SWP). Amortization expense related to SWP was \$11.9 million in first-quarter 2021.
- Effective tax rates were 22.6% in first-quarter 2021 and 21.5% in first-quarter 2020. The increase in our effective tax rate was due to decreased tax benefits associated with a lower volume of stock option exercises.
- We repurchased 1.2 million shares of our common stock for \$66.9 million during the first-quarter 2021.
- Cash flow from operations was \$136.6 million, or \$0.94 per share, and free cash flow was \$126.0 million during the first-quarter 2021.
