SEI Euro Strategic Portfolios

Diversification at every level

Important Information

The SEI Strategic Portfolios are a series of the SEI Funds and may invest in a combination of other SEI and Third-Party Funds as well as in additional manager pools based on asset classes. These manager pools are pools of assets from the respective Strategic Portfolio separately managed by Portfolio Managers, which are monitored by SEI. One cannot directly invest in these manager pools.

Investments in SEI Funds are generally medium to long-term investments. The value of an investment and any income from it can go down as well as up. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors may get back less than the original amount invested. SEI Funds may use derivative instruments which may be used for hedging purposes and/or investment purposes. Additionally, this investment may not be suitable for everyone. If you should have any doubt whether it is suitable for you, you should obtain expert advice.

No offer of any security is made hereby. Recipients of this information who intend to apply for shares in any SEI Fund are reminded that any such application may be made solely on the basis of the information contained in the Prospectus. This material represents an assessment of the market environment at a specific point in time and is not intended to be a forecast of future events, or a guarantee of future results. This information should not be relied upon by the reader as research or investment advice regarding the Funds or any stock in particular, nor should it be construed as a recommendation to purchase or sell a security, including futures contracts.

The investment risks described below are not exhaustive and potential investors should carefully review the Prospectus prior to investing. The risks described below may apply to the underlying assets of the products into which the Strategic Portfolios invest.

- ▶ *Investment in equity securities in general are subject to market risks that may cause their prices to fluctuate over time.*
- ▶ *Fixed Income securities are subject to credit risk and may also be subject to price volatility and may be sensitive to interest rate fluctuations.*

- ▶ *Absolute return investments utilise aggressive investment techniques which may increase the volatility of returns. If the correlation between absolute return investments and other asset classes within the fund increases, absolute return investments' expected diversification benefits may be decreased.*

In addition to the normal risks associated with investing, international investments may involve risk of capital loss from differences in generally accepted accounting principles or from economic or political instability in other nations. The Funds are denominated in one currency but may hold assets which are priced in other currencies. The performance of the Fund may therefore rise and fall as a result of exchange rate fluctuations. The Fund or some of its underlying assets may hold derivatives or borrow to invest. This can make the Fund more volatile and investors should expect above-average price increases or decreases.

While considerable care has been taken to ensure the information contained within this document is accurate and up-to-date, no warranty is given as to the accuracy or completeness of any information and no liability is accepted for any errors or omissions in such information or any action taken on the basis of this information. This information is approved, issued and distributed by SEI Investments (Europe) Limited, 1st Floor, Alphabeta 14-18 Finsbury Square, London EC2A 1BR which is authorised and regulated by the Financial Conduct Authority. Please refer to our latest Full Prospectus (which includes information in relation to the use of derivatives and the risks associated with the use of derivative instruments), Simplified Prospectus and latest Annual or Interim Short Reports for more information on our funds. This information can be obtained by contacting your Financial Adviser or using the contact details shown.

Allocations shown are SEI's target strategic asset allocations, which are based on our long-term expectations for the global markets and are derived from our capital market assumptions. In the short-term, we may over- or underweight these positions as part of our active asset allocation, which aims to take advantage of short-term market opportunities. Please refer to the most current fact sheets for the funds' target active allocations, which more closely reflect the funds' current allocations.

Defensive Fund

The investment objectives of the SEI Defensive Fund aim to protect against the risk of a significant loss of capital while providing an opportunity for income and capital growth.

*The absolute return asset class aims to exploit active management opportunities that are not always accessible in conventional asset classes, such as equity, fixed interest, or cash. This could involve, for example, investing in long (betting on price appreciation) and short positions (betting on price depreciation), to help generate profits or protect capital in both rising and falling markets.

*Holdings information as at 30/06/2017.

Conservative Fund

The investment objectives of the SEI Conservative Fund aim to protect against the risk of a significant loss of capital and provide the opportunity for a conservative level of capital growth and income.
